Re: Mackenzie Construction Project  
Eldred, NY

Dear Tom and Ted,

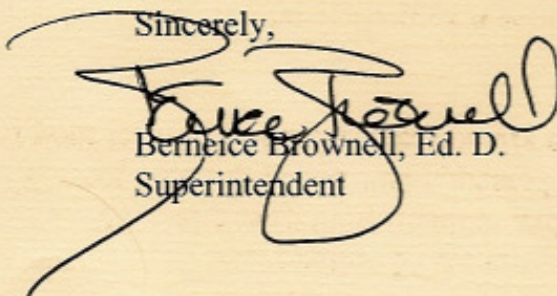

As we anticipate a timely completion of the project at our elementary school, I must take a moment to acknowledge the district's appreciation of the crew involved with the renovation of the elementary school. We had a very tight timeline and a project that required some quick negotiations to correct building issues that appeared unexpectedly. Through all of this, every member of your team responded professionally and in a timely manner.

Our road to this point in the project required navigation of a series of potholes. The actual construction, however, renewed everyone's belief in the construction process in general. Every district employee having contact with your crew reported nothing but positive interactions with each person and praise for the workmanship observed.

As the new superintendent of the district, interactions with Liam and Tom highlighted just how much can be accomplished when a job is done cooperatively and with respect for all involved. It is our hope that we have an opportunity to work with your team again. They definitely exceeded all expectations, and for this we are appreciative.

Please feel free to contact me if any additional information or comments are needed from the school.

Sincerely,

  
Berniece Brownell, Ed. D.  
Superintendent
